Note: Documents sent in via email (photo/scan) can not be considered as we need the original signature!

Dear Supporters,

thank you very much for your interest in becoming involved in actions being taken against the patent on tomatoes held by Syngenta. This document is supposed to enable your active participation, so that together we can oppose patent EP 1515600.

Background: In 2015, the European Patent Office granted the aforementioned patent EP 1515600 to Syngenta, which claims tomatoes with a high content of so-called flavonols. These compounds are supposedly beneficial to health. The patent covers the plants, the plant varieties with the respective plant characteristics, the seeds and the fruits. This so-called "invention", however, is simply a product of crossing tomatoes from the countries of origin (Latin America) with varieties currently grown in the industrialised countries. European Patent Law prohibits patents on plant varieties and on conventional breeding (Art 53 b, European Patent Convention).

We are filing a joint opposition in which we would like you to become part of if

- you are at least 18 years old and
- you **fill in and sign the attached document** (please note, this information will become publicly accessible within the course of the opposition) and **return it to us by 2 May 2016**.

Note: The personal information you fill in has to be correct!

We will then collect all the documents and file a joint opposition through a representative patent lawyer. This opposition is intended not only to start the legal process to obtain the revocation of the above patent, but also to send a strong political signal that no patents on life, especially on plants and animals, should ever be granted.

There will be no costs to you arising from this opposition procedure or any ensuing appeal procedure. For further information, including the text of the patent and the text of opposition please visit:

<http://no-patents-on-seeds.org/en/recent-activities/joint-opposition>

If you have any further questions, please send an email mentioning "joint opposition" to: johanna.eckhardt@no-patents-on-seeds.org.

Please print out the following page, fill it out, sign it and return it to one of the above postal addresses by 2 May 2016!

Joint opposition against European patent EP 1515600

Title: FLAVONOL EXPRESSING DOMESTICATED TOMATO AND METHOD OF PRODUCTION

Application number: 03760244.8

Proprietor: Syngenta Participations AG, 4058 Basel (CH)

Date of publication and mention of the grant of the patent: 12.08.2015

Date of opposition: 11.05.2016

Opponent:

Name:	
Street, number:	
Postal code:	
City:	
Country:	
Nationality:	

Joint representative:

DTS Patent- und Rechtsanwälte Schnekenbuehl und Partner mbB

St.-Anna-Str. 15

80538 München

Germany

The representative can also authorise a further representative.

Opposition is filed against the patent as a whole. Revocation of the whole patent and if necessary a public hearing of the opposition is requested.

Grounds for opposition are, in particular:

The subject-matter of the European patent opposed is not patentable (Art. 100(a) EPC) because:

- it is not new (Art. 52(1); Art. 54 EPC)
- it does not involve an inventive step (Art. 52(1); Art. 56 EPC)
- patentability is excluded under Article 53 (a) and (b).

Furthermore, the patent opposed does not disclose the invention in a manner sufficiently clear and complete for it to be carried out by a person skilled in the art (Art. 100(b) EPC; see Art. 83 EPC).

Facts (Rule 76(2)(c) EPC) presented in support of the opposition are submitted herewith on a separate sheet (annex 1).

Place, date

signature

If you'd like to stay informed about the further process via email, please fill in this page and attach it to the opposition form.

The e-mail address will not be sent to the EPO, published or used for other purposes.
